

STEVIA IN LANDS

STAGE	PRODUCT	Application Rate
Before Planting	15 tons treated cow manure	
At Planting	Basal Fertilizer	400 kgs 6.23.23 Blend
At Planting	Kynopop	10 kgs per hectare sprayed over top of cutting
At Planting	Velum	1lt per hectare drenched into planting holes
After 1st Irrigation	Liquid Lime (Calsap broadcast)	2lts per hectare
After Planting		(Hand control is the best weed control on Stevia)
After Planting	Kyno Micro Algae	
1 Week After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
1 Week After Planting	Veggie Oemff Starter	2 kgs/hectare as a foliar feed
2 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
2 Weeks After Planting	GreenGold Top dressing	100kgs/ha (Calcium urea topdressing with boron)
3 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
3 Weeks After Planting	Veggie Oemff Starter	2 kgs/hectare as a foliar feed
3 Weeks After Planting	Kyno	
4 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
4 Weeks After Planting	Kynoplus Top dressing	150kgs/ha (Slow Release Nitrogen)
5 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
5 Weeks After Planting	Veggie Oemff Starter	2 kgs/hectare as a foliar feed
5 Weeks After Planting	Velum	0.5 lts/ha drenched over planted (Water before applying)
6 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
7 Weeks After Planting	Veggie Oemff Grow	2 kgs/hectare as a foliar feed
7 Weeks After Planting	Potassium Nitrate Greenhouse	100 kgs/ha
8 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
9 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
9 Weeks After Planting	Veggie Oemff Grow	2 kgs/hectare as a foliar feed
10 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
11 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
11 Weeks After Planting	Veggie Oemff Fruit	2 kgs/hectare as a foliar feed
12 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
13 Weeks After Planting	Copper Oxychloride	4.5 kgs/hectare in 150 litre
13 Weeks After Planting	Veggie Oemff Fruit	2 kgs/hectare as a foliar feed
13 Weeks After Planting	Potassium Nitrate Greenhouse	1 kg/hectare as a foliar feed
After Harvesting		
Day After Harvesting	Veggie Oemff Starter	2 kgs/hectare
Day After Harvesting	GreenGold Top dressing	120 kgs/ha (Calcium urea topdressing with boron)
