

Sweet Potatoes

At Planting	500kgs 6.28.23	
4-5 Weeks after germination	200kgs Green Gold	3kgs Veggie starter
6 weeks	300kgs Muriate of Potash	3kgs Veggie Fruit
8 weeks	100kgs Unika Calcium	3kgs Veggie Fruit

Plant root stock - 1 hectare of sweet potatoes will plant out 8 hectares of new crop

Make sure your stock is virus free

If lands are high in nematodes use velum at 2 litres per hectare

Spray every two weeks with Chlorophyrifhos at 2lt/ha or 4lt/ha through pivot for sweet potato weevil

Spray with thunder at 350mls/ha at any sign of worms

Spray 1-1,5l/ha of Dual Magnum pre planting

Spray 1,5 to 2ltrs/ha of fusilade forte depending on grass size for post emergent control

Spray 3ltrs/ha Basagran for post emergent control
