

MAGUIRES RASBERRIES GROWERS GUIDE

Please remember to always read the label before using any chemical

RASBERRIES FERTILIZER PROGRAM

This is a broad outline for fertilization of raspberries. Recommendations will vary depending on specific soil samples.

Amounts of fertilizer required will differ according to actual soil analysis and soil texture (clay %)

Ideal pH (KCL) should be 5 - 5.5. Raspberries prefer slightly acidic soil. Correct pH where necessary.

GROWTH STAGE	AMMONIUM SULPHATE	6.28.23	NITROBOR	KCL	MAP TECH	Foliar Leaf Sprays				N	P2O5	K2O	Ca	Mg	S	B
						KYNOPOP	VEGGIE STARTER	VEGGIE GROW	VEGGIE FRUIT							
Pre-Planting	150kg									31					36	
Planting		300kg				10kg				18	84	69	9		21	0.45
1 Month after Planting			100kg				3kg/ha			15.5			19			0.3
2 Months after Planting	100kg			100kg			3kg/ha			21		60			24	
Year 2 – Spring	150kg		150kg	100kg	100kg			3kg/ha		57	59	60	23		36	0.45
Year 2 – March	100kg		100kg						3kg/ha	36			19		24	0.3
Year 3 – Spring	100kg		200kg	100kg	100kg			3kg/ha	3kg/ha	64	59	60	38		24	0.6
Year 3 - March	100kg		150kg						3kg/ha	36			19		24	0.45
