#### Emulsifiable Concentrate.

A translaminar GABA inhibitor acaricide and insecticide for the control of red spider mites on roses and tomatoes and American leafminer (*Liriomyza trifolii* and *L. Huidobrensis*) on tomatoes and potatoes.

Registered by: Syngenta Agro AG 32 Sandringham Drive Alexandra Park, Harare Tel.: 08677005432 / 08677005434

DESCRIPTION: BOOKLET / 4-16 PG 194 X 62 MM

S-PAC

#### Precautions

- + Handle with care: avoid splashing / contact; poisonous by swallowing, inhalation and contact with skin.
- Wear full protective clothing i.e. rubber gloves, rubber boots, overalls, hood and respirator.
- DO NOT eat, drink or smoke while applying this insecticide.
- Remove protective clothing on completion of spraying and wash hands and face thoroughly with soap and water.
- DANGEROUS TO WILD ANIMALS, BIRDS, BEES AND OTHER ANIMALS.
- EXTREMELY DANGEROUS TO FISH, DO NOT CONTAMINATE DRINKING POOLS, DAMS, RIVERS AND WATERWAYS.
- DANGEROUS TO LIVESTOCK AND DOMESTIC PETS.
- KEEP OUT OF REACH OF CHILDREN.
- KEEP APART FROM FOOD AND FOODSTUFFS.
- Decontamination of Sprayer after use clean the sprayer thoroughly and ensure that all traces of DYNAMEC 018 EC are removed.
- Make use of the following method: (a) Drain tank then rinse tank, sprayer boom and hoses with clean water

for at least 10 minutes. (b) Fill tank with clean water and add to it 1,0 litre household bleach (5%) or 1,5 litres household bleach (3,5%) per 200 litres of water. Rinse hoses and sprayer boom and leave in the tank for 15 minutes whilst agitating. Drain through the nozzle outlets. (c) Repeat step (b) and thereafter, rinse thoroughly with clean water and dispose of the wash water at a site designated for the disposal of pesticides.

• Empty container disposal – invert the empty container over the spray tank and allow to drain for at least 30 seconds after the flow has slowed down to a drip. Thereafter, rinse the container 3 times with a volume of water equal to at least 10% of that of the container. And the rinsate to the contents of the spray tank. Destroy the empty container by perforation and flattening. Place it in a secure disposal area and offer it for recycling.

DO NOT use it for any other purpose.

#### Symptoms of poisoning:

Dilation of pupils, muscular incoordination and muscular tremors.

#### First Aid:

If poisoning is suspected, stop work immediately and seek medical advise. In case of contact with eyes, rinse eyes immediately with abundant fresh and clean water for at least 15 minutes.

In case of contact with skin, remove contaminated clothing and wash contaminated body area with plenty of soap and water.

DO NOT rub skin hard.

If inhaled move to clean air, give artificial respiration or closed chest cardiac massage if necessary, maintain open airway passages.

If swallowed give immediately medical charcoal in a large quantity of water. Do not induce vomiting. **Note:** Never give anything by mouth to an unconscious person.

#### Note to physician:

If toxicity from exposure has progressed to cause severe vomiting, the extent of resultant fluid and electrolyte imbalance should be gauged. Appropriate supportive parental fluid replacement therapy should be given, along with other required supportive measures (such as maintenance of blood pressure levels and proper respiratory functionality) as indicated by clinical signs, symptoms and measurements. In severe cases, observations should continue for at least several days until clinical condition is stable and normal. Since abamectin is believed to enhance GABA activity in animals, it is probably wise to avoid drugs that enhance GABA activity (barbiturates, benzodiazepines, valproic acid) in patients with potentially toxic abamectin exposure.

#### Preparing Mixture:

Fill 1/4-1/2 tank with clean water. Add the required amount of Dynamec<sup>®</sup> 18 EC and begin agitation of the spay mixture.

Fill the tank to the required level with clean water. Maintain agitation until spraying is complete.

Crop	Pest	Amount of Dynamec <sup>®</sup> 18 EC / ha or as stated	Application directions
Roses	Red spider mite	560 ml	Apply a full cover spray at first sign of infestation using a least 500 litres water/ha. A repeat application may be necessary where there is heavy established infestation.
Tomatoes	Red spider mite and American leafminer	560 ml / ha or 60 ml / 100 l water	Apply a full cover spray at first sign of infestation and repeat at 7 day intervals if necessary. Harvest interval: 3 days.

mir Ir

Crop	Pest	Amount of Dynamec <sup>®</sup> 18 EC /	Application directions
		ha or as stated	
Potatoes	(Liriomyza trifolii	560 ml / ha	Start treatment when adult flies or leaf punctures are first
	and		observed.
	L. Huido-brensis)		Apply a maximum of four sprays of Dynamec <sup>®</sup> 18 EC per
			season (not more than two sequential applications).
			Harvest interval: 14 days.

**NB:** To prevent red spider mites and leafminers developing resistance, alternate Dynamec<sup>®</sup> with chemicals that belong to different chemical groups, e.g. Polo<sup>®</sup> and Trigard<sup>®</sup> respectively.

#### Compatibility:

The compatibility of Dynamec<sup>®</sup> 18 EC with other products may be influenced by the formulation of the products involved as well as the quality of the water. Since the formulation of other products may change without the knowledge of Syngenta, and the quality of the water may vary from farm to farm, a physical test should always be carried out prior to application. Dynamec<sup>®</sup> 18 EC can be mixed with waters of different pH values and hardness normally encountered in agricultural conditions. Consult manufacturer for compatibility with other pesticides.

#### Warranty:

The user bears the risk for damage resulting from factors beyond the manufacturer's control. All recommendations for use of the product are based on the current state of the manufacturer's knowledge. Since the manufacturer cannot control the application, use, storage or processing of the product, the manufacturer cannot therefore accept responsibility.

#### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)				
Acute toxicity, Category 4	H302: Harmful if swallowed.			
Eye irritation, Category 2	H319: Causes serious eye irritation.			
Specific target organ toxicity - repeated exposure, Category 2	H373: May cause damage to organs through pro- longed or repeated exposure.			
Acute aquatic toxicity, Category 1	H400: Very toxic to aquatic life.			
Chronic aquatic toxicity, Category 1	H410: Very toxic to aquatic life with long lasting effects.			

#### 2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Version 7.2	Revision Date: 06.06.2016		DS Number: 1144779184	This version replaces all previous versions.
Hazard pictograms		:		
Signa	Il word	:	Warning	
Hazard statements		:	H302 H319 H373	Harmful if swallowed. Causes serious eye irritation. May cause damage to organs through pro- longed or repeated exposure.
			H410	Very toxic to aquatic life with long lasting effects.
	lemental Hazard ments	:	EUH401	To avoid risks to human health and the environment, comply with the instructions for use.
Preca	autionary statements	:	<b>Prevention:</b> P260	Do not breathe dust/ fume/ gas/ mist/ va- pours/ spray.
			P280 <b>Response:</b>	Wear eye protection/ face protection.
			P314	Get medical advice/ attention if you feel unwell.
			P337 + P313	If eye irritation persists: Get medical advice/ attention.
			P391 <b>Disposal:</b>	Collect spillage.
			P501	Dispose of contents/ container to an ap- proved waste disposal plant.

Hazardous components which must be listed on the label: abamectin (combination of avermectin B1a and avermectin B1b)

#### 2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

### **SECTION 3: Composition/information on ingredients**

#### 3.2 Mixtures

#### Hazardous components

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

General advice	: Have the product container, label or Safety Data Sheet with you when calling the emergency number, a poison control center or physician, or going for treatment.
lf inhaled	<ul> <li>Move the victim to fresh air.</li> <li>If breathing is irregular or stopped, administer artificial respiration.</li> <li>Keep patient warm and at rest.</li> <li>Call a physician or poison control centre immediately.</li> </ul>
In case of skin contact	<ul> <li>Take off all contaminated clothing immediately.</li> <li>Wash off immediately with plenty of water.</li> <li>If skin irritation persists, call a physician.</li> <li>Wash contaminated clothing before re-use.</li> </ul>
In case of eye contact	<ul> <li>Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.</li> <li>Remove contact lenses.</li> <li>Immediate medical attention is required.</li> </ul>
If swallowed	<ul> <li>If swallowed, seek medical advice immediately and show this container or label.</li> <li>Do NOT induce vomiting.</li> </ul>
4.2 Most important symptoms a	nd effects, both acute and delayed
Symptoms	: Lack of coordination Tremors Dilatation of the pupil
4.3 Indication of any immediate	medical attention and special treatment needed

Treatment	:	This material is believed to enhance GABA activity in animals.

### **SECTION 5: Firefighting measures**

5.1 Extinguishing media	
Suitable extinguishing media	<ul> <li>Extinguishing media - small fires</li> <li>Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.</li> <li>Extinguishing media - large fires</li> <li>Alcohol-resistant foam</li> </ul>
Unsuitable extinguishing media	: Do not use a solid water stream as it may scatter and spread fire.
5.2 Special hazards arising from t	the substance or mixture
Specific hazards during fire- fighting	<ul> <li>As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10).</li> <li>Exposure to decomposition products may be a hazard to health.</li> <li>Flash back possible over considerable distance.</li> </ul>
5.3 Advice for firefighters	
Special protective equipment for firefighters	: Wear full protective clothing and self-contained breathing apparatus.
Further information	<ul> <li>Do not allow run-off from fire fighting to enter drains or water courses.</li> <li>Cool closed containers exposed to fire with water spray.</li> </ul>

### **SECTION 6:** Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	: Refer to protective measures listed in sections 7 and 8.
----------------------	--

Version 7.2	Revision Date: 06.06.2016	SDS Number: S1144779184	This version replaces all previous versions.
6.2 Enviro	onmental precautions		
Envir	onmental precautions	Do not flush in	r leakage or spillage if safe to do so. to surface water or sanitary sewer system. contaminates rivers and lakes or drains inform norities.
6.3 Metho	ods and material for c	ontainment and clea	aning up
Meth	ods for cleaning up	sorbent materi miculite) and p	e, and then collect with non-combustible ab- al, (e.g. sand, earth, diatomaceous earth, ver- lace in container for disposal according to local lations (see section 13).

#### 6.4 Reference to other sections

Refer to disposal considerations listed in section 13., Refer to protective measures listed in sections 7 and 8.

#### **SECTION 7: Handling and storage**

7.1 Precautions for safe handling	
Advice on safe handling :	<ul> <li>No special protective measures against fire required.</li> <li>Avoid contact with skin and eyes.</li> <li>When using do not eat, drink or smoke.</li> <li>For personal protection see section 8.</li> </ul>
7.2 Conditions for safe storage, inc	luding any incompatibilities
Requirements for storage : areas and containers	No special storage conditions required. Keep containers tight- ly closed in a dry, cool and well-ventilated place. Keep out of the reach of children. Keep away from food, drink and animal feedingstuffs.
Other data :	Physically and chemically stable for at least 2 years when stored in the original unopened sales container at ambient temperatures.
7.3 Specific end use(s)	
Specific use(s)	For proper and safe use of this product, please refer to the approval conditions laid down on the product label.

#### **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

#### Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis

#### 8.2 Exposure controls

#### **Engineering measures**

Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated.

The extent of these protection measures depends on the actual risks in use.

If airborne mists or vapors are generated, use local exhaust ventilation controls.

Assess exposure and use any additional measures to keep airborne levels below any relevant exposure limit.

Where necessary, seek additional occupational hygiene advice.

#### Personal protective equipment

Eye protection		Tightly fitting safety goggles
	•	Always wear eye protection when the potential for inadvertent eye contact with the product cannot be excluded.
Hand protection		
Material	:	Nitrile rubber
Break through time	:	> 480 min
Glove thickness	:	0.5 mm
Remarks	:	The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other. Please observe the instruc- tions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consid- eration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. The break through time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case. Gloves should

N	- t		

No data available

#### **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

See section 10.3 "Possibility of hazardous reactions".

#### 10.2 Chemical stability

Stable under normal conditions.

#### 10.3 Possibility of hazardous reactions

Hazardous reactions : No dangerous reaction known under conditions of normal use.

#### 10.4 Conditions to avoid

Conditions to avoid : No decomposition if used as directed.

#### 10.5 Incompatible materials

Materials to avoid : None known.

#### **10.6 Hazardous decomposition products**

Combustion or thermal decomposition will evolve toxic and irritant vapors.

Version Revis 7.2 06.06

Revision Date: 06.06.2016

SDS Number: S1144779184 This version replaces all previous versions.

#### **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

Acute toxicity		
Product: Acute oral toxicity	:	LD50 (Rat, female): 891 mg/kg
Acute inhalation toxicity	:	LC50 (Rat, male and female): > 5.04 mg/l Exposure time: 4 h Test atmosphere: dust/mist Assessment: The substance or mixture has no acute inhala- tion toxicity
Acute dermal toxicity	:	LD50 (Rat, male and female): > 5,050 mg/kg
Components: cyclohexanol: Acute oral toxicity		LD50 (Rat, male and female): 1,400 mg/kg
Acute inhalation toxicity		LC50 (Rat, male and female): > 3.6 mg/l Exposure time: 4 h Test atmosphere: dust/mist Assessment: The component/mixture is moderately toxic after short term inhalation.
<b>2,6-di-tert-butyl-p-cresol:</b> Acute oral toxicity	:	LD50 (Rat): > 5,000 mg/kg

	ectin (combination of a cumulation			avermectin B1b): not bioaccumulate.
	on coefficient: n- bl/water	:	log Pow: 4.4	
12.4 Mobil	ity in soil			
Comp	onents:			
	ectin (combination of a ution among environ- l compartments		rmectin B1a and Remarks: Slightly	
menta				

Version 7.2	Revision Date: 06.06.2016	SDS Number: S1144779184	This version replaces all previous versions.			
12.5 Resu	ilts of PBT and vPvB a	assessment				
<u>Product:</u> Assessment		: This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.				
cyclo	oonents: hexanol: ssment	lating and toxic	e is not considered to be persistent, bioaccumu- c (PBT) This substance is not considered to be and very bioaccumulating (vPvB)			
	i-tert-butyl-p-cresol: ssment	: This substance lating and toxic	e is not considered to be persistent, bioaccumu- c (PBT)			
	ectin (combination of ssment	: This substance lating and toxic	d avermectin B1b): e is not considered to be persistent, bioaccumu- c (PBT) This substance is not considered to be and very bioaccumulating (vPvB)			
12.6 Othe	r adverse effects					
<u>Prod</u> e Additi matio	onal ecological infor-	Classification of	onic aquatic toxicity of the product is based on the summation of the of classified components.			
	<u>oonents:</u> hexanol:					
Additi matio	onal ecological infor- n	: Remarks: No d	lata available			
2,6-d	i-tert-butyl-p-cresol:					
Additi matio	onal ecological infor- n	: Remarks: No d	lata available			
abam	ectin (combination of	f avermectin B1a an	d avermectin B1b):			
Additi matio	onal ecological infor- n	: Remarks: No d	ata available			

### **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

Product

: Do not contaminate ponds, waterways or ditches with chemical or used container. Do not dispose of waste into sewer.

Version 7.2	Revision Date: 06.06.2016	SDS Number: S1144779184	This version replaces all previous versions.
		tion.	recycling is preferred to disposal or incinera- practicable, dispose of in compliance with
Contaminated packaging		<ul> <li>Empty remaining contents.</li> <li>Triple rinse containers.</li> <li>Empty containers should be taken to an approved waste han- dling site for recycling or disposal.</li> <li>Do not re-use empty containers.</li> </ul>

#### **SECTION 15: Regulatory information**

# 15.1 Safety, health and environmental regulations/legislation specific for the substance or mix-ture

- Other regulations : Take note of Directive s
  - : Take note of Directive 98/24/EC on the protection of the health and safety of workers from the risks related to chemical

Version	Revision Date:
7.2	06.06.2016

SDS Number: S1144779184

This version replaces all previous versions.

agents at work.

#### 15.2 Chemical safety assessment

A Chemical Safety Assessment is not required for this substance when it is used in the specified applications.

#### **SECTION 16: Other information**

Full text of H-Statements					
H300 :	Fatal if swallowed.				
	Harmful if swallowed.				
H311 :	Toxic in contact with skin.				
H315 :	Causes skin irritation.				
H319 :	Causes serious eye irritation.				
H330 :	Fatal if inhaled.				
H332 :	Harmful if inhaled.				
H335 :	May cause respiratory irritation.				
H361d :	Suspected of damaging the unborn child.				
	Causes damage to organs through prolonged or repeated				
	exposure.				
H400 :	Very toxic to aquatic life.				
	Very toxic to aquatic life with long lasting effects.
