

DK777

Relative Maturity

4 - 5 months

Region: Medium to Mid -high Altitude (1400 – 1900)

Key Strengths

- High and stable yielder with potential of up to 10tons/Ha under good agronomic management.
- Tolerant to Maize Lethal Necrosis (MLN) disease.
- Good tolerance to leaf diseases.
- Double cobbing potential.
- Exceptional good grain texture (flint grain type) good for poundability.
- Strong stem and stands well.
- Uniform cob placement, ease when machine harvesting.

MATURITY

Medium

PHYSIOLOGICAL MATURITY

125-135 days

TONS PER HECTARE/ YIELD

11m/ha

DK777

- High stable yield potential
- Excellent grain quality
- Good husk cover
- Good drought tolerance
- Good all round disease tolerance: very good (diplodia ear rot & gibberella ear rot), good (GLS), fair (northern leaf blight) moderate for MSV

Keep Safe, Always Observe Covid Guidelines
