

# DKC90-89

## Relative Maturity

4 - 4.5 months

**Region:** 1400 - 1900m asl

## Key Strengths

- High and stable yielder with potential of up to 10tons/Ha under good agronomic management.
- Good tolerance to leaf diseases.
- Double cobbing potential.
- Exceptional good grain texture (flint grain type) good for poundability.
- Strong stem and stands well.

### **MATURITY**

Medium

### **PHYSIOLOGICAL MATURITY**

115-125 days

### **TONS PER HECTARE/ YIELD**

12m/ha

# **DKC90-89**

- Exceptional yielder
- Flint grain & good husk cover
- Good disease tolerance (very good to excellent for GLS, northern leaf blight and gibberella ear rot; good for diplodia ear rot and moderate resistance for GLS)

*Keep Safe, Always Observe Covid Guidelines*
