

MAGUIRES TRIALS ON FLUMETRALIN DUO EC

Flumetralin Duo EC is an emulsifiable concentrate locally systemic and contact plant growth regulator for the control of suckers on flue-cured and burley tobacco.

Active Ingredients: 135g/lit Flumetralin 300g/lit N-Decanol

Inert Ingredients: 565g/lit

SMALL SCALE TRIAL – SEASON 2021-22/23

Several small-scale tobacco trials have been done to compare the application of **FLUMETRALIN DUO EC** vs **N-DECANOL**:

N-DECANOL

In image above, it is clear that the N-Decanol application has burnt the sucker (increases risk of barn rot)

FLUMETRALIN DUO EC

In image above, it is evident that the Flumetralin Duo EC application has distorted the sucker
